

GEORGIA LONG-TERM DRUG REHAB

According to SAMHSA, there are over 500 drug rehab centers in Georgia. This includes over 70 detox programs, 25 short-term centers, over 45 long-term residential facilities, and over 200 outpatient programs.

WHY?

Long-term programs help you develop lasting sober relationships and a solid, sober network. Spending a lengthy time in one place means you will meet other sober like-minded people that can help get you on the path to recovery.

STRUCTURED ENVIRONMENT

Residential long-term programs focus on structure, routine, and habit. Maintaining sobriety during the early weeks of recovery help with a solid routine and a structured environment, which is established during a 60 or 90-day stay at a treatment center.

LONG TERM REHAB SERVES MULTIPLE NEEDS

Long-term programs provide more time to attend to your multiple needs, not just substance use. Well-rounded treatment involves helping you with medical, physical, social, vocational, or even legal problems.

DIFFERENT THERAPY APPROACHES

Multiple treatment methodologies are utilized. Because programs may last for 30 to 90 days or longer, there is more opportunity to incorporate traditional and non-traditional therapy approaches.

ADDITIONAL RESOURCES

Finding the right drug rehab in Georgia is crucial to long-term recovery and sobriety. Alcohol, marijuana, cocaine, and pain medication are some of the most widely used substances in Georgia. Below we have provided some resources if you or a loved one are struggling with addiction.
